From The Executive Director

Thanks for checking out the 2014 College Town Film Festival.

I started this festival with one goal. To help filmmakers find an audience. Along the way, we discovered that audiences were searching too. Searching for something that transcends and undercuts the Hollywood system; and I thought what better place to do this than a college town? College towns are perfect places for new ideas, full of thinking people with faculty, students and university communities with a deep interest in genuine discussion and learning.

The truth is if you want to promote independent film, you have to bring audiences fun, smart and/or important independent films that have something new to say.

It turns out that if you announce to filmmakers that you plan to screen their movie on several college campuses... you will have one hell of an eclectic list of movies to choose from.

So see a bunch of movies this weekend. Go to that documentary you'd normally shy away from. Attend a workshop. Drag your friends to the short film programs. And don't miss the opportunity to interact with a legend: Julian Doyle.

And then, let us know what you think. Tell us what you love. Tell us what you hate. And tell us why.

I'm proud to say that this festival is still an experiment. I hope it always will be. Welcome to our traveling laboratory.
